Professional Summary

Results-driven **Full-Stack Developer (MERN & Next.js)** and Computer Science student. Experienced in building high-performance, real-time applications using Node.js, Express, and modern React frameworks. Proficient in implementing complex backend logic, including WebSockets, secure authentication, and relational database management. Focused on writing SEO-friendly, maintainable code and optimizing server-side performance.

Availability: Available for full-time hours immediately (Sept–Oct break); open to evening/flexible shifts during academic terms.

Technical Skills

Frontend: **Next.js (App Router)**, React.js, Modern JavaScript (ES6+), TypeScript, Redux Toolkit, React Query, Tailwind CSS

Backend: Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Socket.io, Supabase, GraphQL, REST

Tools: Git, GitHub, Vercel, Netlify, Render, Postman, Prisma ORM, Zustand

Core: Server-Side Rendering (SSR), WebSockets, Relational DBs, OOP, Data Structures

Professional Experience

IIFA TECH — **Lahore, Pakistan**

Full-Stack Developer (Apprentice & Intern) — *July 2025 – June 2026*

- **Headless E-commerce Solutions:** Engineered and deployed high-performance headless storefronts using Next.js, integrating the Shopify Storefront API via GraphQL queries and mutations to manage complex UI states and optimize cache validation.
- **Codebase Refactoring & Optimization:** Spearheaded the refactoring of legacy and complex modules into clean, maintainable, industry-standard code, improving overall system readability and execution efficiency.
- **API Integration & Architecture:** Collaborated with the engineering team to design RESTful APIs, manage frontend state, and navigate the full software development lifecycle utilizing advanced Git workflows for production deployments.

Key Projects

Ashley's — **Next.js, Prisma, PostgreSQL, Zustand**

Full-Stack Luxury E-commerce Platform — *Live App*

- Architected a highly scalable Next.js 16 (App Router) e-commerce platform, making full use of the new Next.js 16 Cache API alongside Server-Side Rendering (SSR) for optimal SEO and rapid client-side hydration.
- Engineered a complex relational PostgreSQL database using Prisma ORM to seamlessly manage dynamic product variants, automated inventory tracking, and a secure role-based Admin dashboard.
- Implemented robust authentication via Auth.js and built a real-time, optimistic UI shopping cart and persistent wishlist system, synchronized globally using Zustand.

Brioza — **Next.js, GraphQL, Supabase**

Headless Multilingual E-commerce — *GitHub*

- Engineered a Next.js headless storefront consuming the Shopify Storefront API via GraphQL for cart management, secure authentication, and optimized multi-region SSR (English, French, Spanish).
- Integrated Supabase for Role-Based Access Control (RBAC) and persistent wishlists, bridging Shopify data with custom relational schemas.
- Configured advanced dynamic routing protocols to optimize global SEO indexing and deliver sub-second page loads.

Nexus — **MERN Stack, Socket.io**

Ticket Management System — *GitHub*

- Engineered a real-time communication layer using **Socket.io** for instant messaging, live updates, and persistent connections.
- Implemented a complex **hierarchical thread-based commenting system** to manage nested and organized user discussions.
- Designed scalable MongoDB database schemas to efficiently query and manage complex ticket state histories.

FinancyBuddy — **MERN Stack, React Query**

Full-Stack Finance Dashboard — *Live App*

- Developed a MERN dashboard utilizing **React Query** for advanced server-state synchronization and data caching.
- Engineered robust backend aggregation pipelines in MongoDB to calculate user income and expense analytics in real-time.

Education

Riphah International College — **Lahore**

Associate Degree in Computer Science (ADP CS), CGPA: 3.89/4.00 — *Sept 2025 – Expected 2027*

- Currently completing the 3rd Semester. Focus on Object-Oriented Programming (C++), Relational Database Management Systems (SQL), and Core Systems Architecture.

Aspire Group of Colleges — **Lahore**

Intermediate in Computer Science — *July 2023 – Sept 2025*
