Professional Summary

Results-driven **Full-Stack Developer (MERN & Next.js)** and Computer Science student. Experienced in building high-performance, real-time applications using Node.js, Express, and modern React frameworks. Proficient in implementing complex backend logic, including WebSockets, secure authentication, and relational/non-relational database management. Focused on writing SEO-friendly, maintainable code and optimizing server-side performance.

Technical Skills

Frontend: **Next.js (App Router)**, React.js, Modern JavaScript (ES6+), Redux Toolkit, React Query, Tailwind CSS, HTML5/CSS3

Backend: Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Socket.io, Supabase, GraphQL, REST

Tools: Git, GitHub, Vercel, Netlify, Render, Postman

Core: Server-Side Rendering (SSR), WebSockets, Relational DBs, OOP, Data Structures

Professional Experience

IIFA TECH **Lahore, Pakistan**

MERN & Next.js Intern *March 2026 – June 2026*

- **Headless E-commerce Solutions:** Engineered and deployed high-performance headless storefronts using Next.js, integrating the Shopify Storefront API via GraphQL queries and mutations to manage complex UI states, optimize cache validation, and handle dynamic inventory updates.
- **Full-Stack MERN Features:** Developed and maintained features for large-scale client codebases, ensuring robust data synchronization and seamless integration between React.js frontends and Node.js/Express.js backend architectures.
- **Codebase Refactoring & Optimization:** Spearheaded the refactoring of legacy and complex modules into clean, maintainable, industry-standard code, improving overall system readability and execution efficiency.
- **API Integration & State Management:** Collaborated with the engineering team to design and consume RESTful APIs, resolving critical system bugs and ensuring the final product strictly adhered to client specifications.
- **Lifecycle & Version Control:** Navigated the full software development lifecycle (SDLC) within an Agile environment, leveraging advanced Git workflows for continuous integration and reliable deployment of production code.

IIFA TECH **Lahore, Pakistan**

MERN Stack Apprentice *July 2025 – Oct 2025*

- Applied a variety of **MERN stack** technologies to build responsive and data-driven web interfaces.
- Successfully architected and deployed a comprehensive full-stack project, managing both frontend state and backend schema.
- Gained hands-on experience with secure user authentication workflows and RESTful API design.
- Utilized Git-based version control for collaborative development and code reviews within a team.

Key Projects

Brioza **Next.js, GraphQL, Supabase**

Headless Multilingual E-commerce *GitHub*

- Engineered a Next.js headless storefront consuming the Shopify Storefront API via GraphQL for cart management, secure authentication, and optimized multi-region SSR (English, French, Spanish).
- Integrated Supabase for Role-Based Access Control (RBAC) and persistent wishlists, bridging Shopify data with custom relational schemas, alongside Klaviyo for automated marketing pipelines.
- Developed dynamic product routing and a conversion-optimized user interface using Tailwind CSS, significantly improving SEO performance and client-side load times.

Nexus (In Progress) **MERN Stack**

Ticket Management System *GitHub*

- Engineered a real-time communication layer using **Socket.io** for instant messaging, live ticket status updates, and notification broadcasts.
- Implemented a complex **hierarchical thread-based commenting system** for organized, deeply nested user discussions.
- Secured the application with JWT sessions and robust Bcrypt password hashing, coupled with a scalable MongoDB schema designed for multi-role access.

FinancyBuddy **MERN Stack**

Full-Stack Finance Dashboard *Live App*

- Developed a comprehensive MERN dashboard for secure financial tracking, custom budget creation, and historical data persistence.
- Utilized **React Query** for advanced server-state synchronization, request deduplication, and optimistic UI updates to ensure a zero-lag experience.
- Engineered RESTful APIs in Express.js to handle complex data aggregations and financial calculations on the server-side before client delivery.

Education

Riphah International University **Lahore**

Bachelor of Science in Computer Science (BSCS), CGPA: 4.00/4.00 *Sept 2025 – Sept 2029*

- Currently completing the 2nd Semester with a 4.00/4.00 CGPA. Focus on Object-Oriented Programming (C++), Relational Database Management Systems (SQL), and Core Systems Architecture.

Aspire Group of Colleges **Lahore**

Intermediate in Computer Science *July 2023 – Sept 2025*

Certifications

2025: Certified MERN Stack Developer - NAVTTC & IIFA TECH
